Professional Summary

DevOps Engineer with 2+ years of experience in CI/CD automation, cloud infrastructure, and containerized deployments on AWS using Docker, Kubernetes, and Terraform. Improved deployment speed by 40% and optimized release cycles using automation and GitOps principles. Skilled in monitoring/observability, troubleshooting, and security operations.

Technical Skills

Cloud	AWS (EC2, S3, IAM, VPC, CloudWatch), Google Cloud (basic exposure)
CI/CD	Jenkins, GitHub Actions, GitLab CI/CD, ArgoCD
Containers	Docker, Kubernetes (EKS)
IaC	Terraform, CloudFormation
Monitoring / Logging	Prometheus, Grafana, Dynatrace, (basic) ELK/Splunk
Security / Ops	IAM least-privilege, secrets management, compliance best practices
Scripting / VCS	Shell, Python, Git, GitHub

Professional Experience

T-Machine Software Solutions — DevOps Engineer (Jan 2023 – May 2025)

- Containerized microservices using Docker & deployed to AWS EC2 (↓ deployment time by 40%).
- Built automated CI/CD using GitLab pipelines (build → test → deploy).
- Provisioned infrastructure using Terraform & CloudFormation (IaC).
- Implemented GitOps strategy using ArgoCD for Kubernetes deployments.
- Configured CloudWatch monitoring & SNS alerting for proactive incident response.
- Designed and implemented CI/CD pipelines with Jenkins in addition to GitLab.
- Implemented observability using Prometheus, Grafana & Dynatrace (APM dashboards/traces).
- Automated deployment tasks using Python/Shell scripting to reduce manual effort.
- Performed troubleshooting and root-cause analysis during incidents; maintained documentation.
- Followed IAM least-privilege, secret management & security compliance practices.

Zensar Technologies — DevOps Intern (Jan 2022 – May 2022)

- Assisted in setting up CI/CD pipelines using Maven and Git reducing manual effort.
- Developed REST APIs using Spring Boot & Hibernate following MVC design patterns.
- Integrated applications with MySQL database improving data processing efficiency.
- Collaborated in Agile/Scrum ceremonies (stand-ups, sprint planning).
- Documented deployment steps and created internal knowledge base wiki.
- Supported monitoring setup using CloudWatch and basic Dynatrace dashboards.
- Helped implement Jenkins jobs and Git workflows for continuous integration.
- Participated in troubleshooting during release cycles.

Education

B.E. – Information Science | KLE Institute of Technology (2018–2023) | CGPA: 7.4
Diploma – Computer Science | Oxford Polytechnic (2015–2018) | 70%

Certifications

AWS Cloud Practitioner (In Progress) • Docker Essentials • GitOps with ArgoCD

Achievements

- Reduced release cycle duration by 40% through pipeline automation.
- Maintained >99% uptime and optimized infra cost using IaC.
